NURSING STUDENT HANDBOOK

ACADEMIC YEAR 2025-2026

Dear Student,

Welcome, on behalf of the faculty and staff of the Department of Nursing at York College, I would like to welcome you and offer congratulations on your admission to the Nursing Program. Pursuing a Bachelor's Degree in Nursing is one of the most worthwhile undertakings in one's life. Therefore, I am pleased that you have chosen to join the student body at York College Nursing Program in your quest for knowledge. You will create new memories of your experiences here at York that will enrich and inspire your life.

Throughout your academic studies as a student, there will be many challenges. Embrace them as you aspire toward personal and professional growth and development. Always be mindful that education is a journey to be savored. Therefore, invest fully in your pursuit of learning.

Please take a few minutes to familiarize yourselves with the information contained in this handbook. It will provide an overview of the Nursing Programs, the requirements for progression to graduation, and the policies, rules and regulations that will guide you as a nursing student at York College.

Again, welcome and best wishes as you pursue your academic endeavors at York College.

Best Regards,

Dr. Renée Wright, EdD, RN, ACUE
Chairperson, Department of Nursing

NURSING PROGRAM MISSION

The mission of the York College Department of Nursing Baccalaureate in nursing programs is to offer a liberal arts-based educational experience to guide students in attaining the knowledge, skills, and values essential for professional nurse leaders and managers, including the ability to make sound judgments and address the health needs of diverse cultural groups within the urban community. There are two nursing program tracks in the Department of Nursing: The RN-Baccalaureate Program is designed to build upon the knowledge and competencies of Registered Nurses, who graduated from associate degree and diploma programs. The Generic Baccalaureate program is designed to prepare competent nursing professionals able to successfully pass the NCLEX-RN licensing examination. The Department of Nursing mission is congruent with the York College Vision and Mission (<http://www.york.cuny.edu/about>).

Department of Nursing Goals

1. To offer a liberal arts-based educational experience to promote the knowledge, skills, and values essential for professional nurse leaders and managers.
2. To develop professional nurses who are proactive in addressing health care issues and able to make sound clinical judgments.
3. To prepare professional nurses who are self-directed and effective communicators in a culturally diverse world.
4. To develop nurses committed to evidenced based and ethical care of various populations across the lifespan throughout the health-illness continuum.

Philosophy

The York College Department of Nursing's philosophy encompasses the faculty's beliefs about the concepts of Education, Nursing, Persons, Society/Environment and Health and provides a framework for the nursing curricula. The departments mission, philosophy and outcomes are consistent with, and responsive to, the York College Vision and Mission statements; the New York State Education Department guidelines for nursing program registration; the American Association of Colleges of Nursing Essentials of Baccalaureate Education for Nursing Practice (2021); the QSEN (Quality Safety Education for Nurses) competencies; the American Nurses' Association Nursing: Scope and Standards of Practice (4th edition) and the ACEN Standards and Criteria (2023).

Education

The faculty believes that education for professional nursing practice is rightfully conducted in an institution of higher learning, with a foundation of liberal arts and sciences supporting the nursing major. Baccalaureate education prepares the learner for beginning Baccalaureate generalist nursing practice and essential components include critical thinking, effective communication skills, ethical accountability, leadership/ management skills, information technology and consideration of the cultural, racial and ethnic diversity of the client (s). Nursing education is a partnership characterized by mutual respect between faculty and students. The responsibility for learning lies with the students, who come equipped with prior knowledge and experiences as well as a desire to learn. The faculty facilitates the students' spirit of inquiry and provides educational experiences that foster the responsibility, independence, and critical thinking of the learner.

Nursing

The faculty believes that nursing is an evidence-based practice profession, which promotes optimal health across the life span through case finding, health teaching, health counseling, and provision of care and support. Nursing is committed to the ethical care and nurture of well and sick people, individually and in groups; and the provision of culturally congruent care. Nursing focuses on health promotion, maintenance, restoration and/or rehabilitation. Professional nurses are self-directed, effective communicators, accountable for their own actions, proactive in addressing health care issues and able to make sound clinical judgments.

Persons

The faculty defines persons to include the individual, family and community and recognizes that nurses interact with them during normal life events as well as critical life situations. The faculty believes that each person has an innate ability and responsibility to choose among situations in their life. The nurse facilitates the person's decision making in health issues.

Society and Environment

The faculty believes that the environment is the context in which persons fulfill their basic needs. In the environment there are mutual and simultaneous interchanges among persons. Societal groups within the environment include families, communities, institutions and nations and these are interrelated and interdependent

Health

The faculty believes that health is a state of wellness or optimal functioning encompassing both disease and non-disease. A person's health state influences the interchanges between the individual, family and community.

The York College Department of Nursing prepares graduates for the baccalaureate generalist roles:

- Provider of care,
- Designer/ manager/ coordinator of care, and
- Member of a profession.

The York College Department of Nursing Student Learning Outcomes were developed from the mission/ philosophy and incorporate critical thinking, effective communication, ethical accountability and cultural competence. Commitment to a life-long spirit of inquiry is considered essential to the development of expertise and currency of theory-based nursing practice within an evolving complex and ambiguous society. Therefore, upon completion of the program the graduates will be able to:

1. Effectively communicate with diverse client populations and disciplines using a variety of strategies and respecting client's cultural beliefs and practices.
2. Make sound judgments that synthesize nursing science and knowledge from other disciplines in the provision of safe, quality nursing care.
3. Collaborate with clients, families, health team members to assist clients in achieving optimal wellness.

4. Advocate for health policies that address local and global health issues through participation in nursing organizations.
5. Integrate a personal philosophy of professional nursing practice incorporating legal, moral and ethical standards.
6. Assume responsibility and accountability for one's own education and nursing practice.
7. Provide a safe environment using technology and information systems in nursing practice.
8. Effectively manage patient care to ensure best possible health care outcomes.
9. Maintain a spirit of inquiry and use research findings to provide evidence-based nursing care.

York College Department of Nursing Terminal Program Outcomes are:

- Performance on licensure exam (generic program only) – Generic graduates NCLEX pass rate will meet or exceed the national mean pass rate.
- Program Completion – 80% of generic track students will complete the program in five semesters; and 80% of RN-BS track students in four semesters (100% program length).
- Program Satisfaction – 80% of graduates will report satisfaction with the nursing program six months after program completion.
- Job Placement – 80% of generic track graduates will be employed as registered nurses six to twelve months after graduation; 80% of RN-BS track graduates, desiring a new position, will attain the position six to twelve months after graduation.

Essential Curriculum Concepts: *consider including or updating these to reflect the NCSBN client need categories*

1. Communication/ collaboration
2. Safety/ technology
3. Critical thinking / nursing process
4. Leadership/ management
5. Professional accountability/ advocacy
6. Legal, moral, ethical research

(revised September 2010; March 2012)

NATIONAL COUNCIL STATE BOARD OF NURSING CLIENT NEED CATEGORIES

- Safe and Effective Care Environment
 - Management of Care
 - Safety and Infection Control
- Health Promotion and Maintenance
- Psychosocial Integrity
- Physiological Integrity
 - Basic Care and Comfort
 - Pharmacological and Parenteral Therapies
 - Reduction of Risk Potential
 - Physiological Adaptation

(NCSBN 2023)

ADMISSION CRITERIA TO THE ENTRY-LEVEL (GENERIC) NURSING PROGRAM

Admission to the Generic Nursing Program is highly competitive and the number of seats is limited each year. The program is designed for full-time study. Students who are interested in the program must meet the requirements for admission to York College and additional eligibility requirements for the program. They are required to take and pass every component of the CUNY Admission Examination in the basic skills areas; reading, writing and mathematics, as well as all required prerequisites science and foundation courses. **Students who have failed/ or been dismissed from another nursing program are not eligible for admission to the York College Generic Nursing Program.**

ENTRY LEVEL (GENERIC) BS PROGRAM ADMISSION REQUIREMENTS

1. Students must meet York College Admission requirements
<http://www.york.cuny.edu/admissions/transfer>
2. Students need to enroll in curriculum UNDECL-BA (Undeclared - Liberal Arts).
3. **Students must have an official transcript sent to the York College Registrar so an evaluation of transfer credits can be made and bring an official transcript to the nursing office at the time of advisement.**
4. Students must complete all pre-requisite courses with a minimum of a C grade.
5. Five key pre-requisite are courses used to calculate the nursing program admission GPA. These key pre-requisite courses can only be taken once. The courses are as follows:
 - a. ENG 125 – Composition I (3 credits)
 - b. PSY 102 – Introductory Psychology (3 credits)
 - c. BIO 234 – Anatomy and Physiology I (4 credits)
 - d. BIO 235 – Anatomy and Physiology II (4 credits)
 - e. CHEM 106 & 107 – Essentials of Chemistry Lecture/Lab (5 credits)
6. Students must take the NLN Nursing Entrance Exam (NEX) online via Proctor360. Students register and pay for the exam at <https://www.york.cuny.edu/nursing/nursing-application/nln-examination>. The exam is administered Proctor360. Students must matriculate (be admitted and currently taking classes) at York College in order to take the exam. Exam dates are posted on the Nursing Program website. This exam **should not** be taken prior to completing CHEM 106/107, BIO 234 and BIO 265. Nursing Entrance Exam (NEX) is administered online only via Proctor360. **MAY ONLY BE REPEATED ONCE.**

7. Applicants will be ranked based on a combination of their GPA in the five key pre-requisite courses: **English 125; Psychology 102; Chemistry 106 & 107; Biology 234 and Biology 235** and their NEX exam score. Admission to the Nursing Program is on a competitive basis. Fulfillment of each of these criteria **DOES NOT** guarantee admission into the program.

8. Applications for admission into the program are submitted electronically during the spring semester when the student is completing pre-requisite courses.

9. All courses must be completed with a final grade entered on the transcript no later than May 31st to be considered for fall semester admission. **Students will not be considered for admission until all pre-requisite courses are complete.** Successful candidates will be notified in June and will be required to attend a mandatory orientation that is held in June or July.

10. PLEASE NOTE: If you are not accepted into the generic nursing program you will need to continue completion of the York College general education course requirements to graduate.

11. There is a ten-year time limit on transfer of science courses in the nursing program. These courses include Biology 234, 235, 265, 382, 336, Chemistry 106, 107 and 230

12. IMMIGRATION STATUS (Applies to all nursing students)

All CUNY nursing departments require applicants for admission into the nursing clinical courses to provide documentation in one of the following categories:

- a. U.S Citizenship
- b. Permanent Residency
- c. International student with F1 status
- d. Granted Asylum, Refugee status, withholding of Removal, or Deferred Action Status by the U.S government

13. Notice to All Nursing Students on Criminal Background Checks

Current laws permit a state licensing board or agency to deny a license to practice nursing if the applicant has been convicted of a felony or other specified crime. The Office of the Professions of the New York State Education Department requires that a criminal background check be conducted prior to granting a license to practice nursing.

The Department of Nursing at York College does not require a criminal background check. However, many of our clinical affiliates frequently require a student to undergo a criminal background check before the student can be placed for clinical learning experience. The affiliate site determines a student's participation in clinical training at their site based upon the background check.

Each clinical affiliate site sets its own standards and procedures, and you may be asked by the site to pay the cost of the background check. There is the possibility you may be placed at more than one site that requires a background check. Therefore, you may have to complete

more than one criminal background check during the course of your enrollment in the York College Nursing program.

Please note that if a clinical training site determines that you may not take part in its training program based on the results of a criminal background check, you may be unable to complete your clinical experience and/or the desired nursing program. It is important for you to consider this before enrolling in the desired nursing program. York College has no obligation to refund your tuition or fees or to otherwise accommodate you in the event you are ineligible to complete your course requirements based on the results of a criminal background check, or if you are denied a license to practice registered nursing.

Questions should be directed to the NYS Office of Professions: <http://www.op.nysed.gov>

PLEASE NOTE: THE BS DEGREE REQUIRES 120 CREDITS; 60 OF WHICH MUST BE LIBERAL ARTS CREDITS

ADMISSION CRITERIA TO THE RN TO BS NURSING PROGRAM

1. Students must meet York College Admission requirements
<http://www.york.cuny.edu/admissions/transfer>
2. Students must have an official transcript sent to the York College Registrar office. The registrar's office will conduct an evaluation of credits that can be accepted for transfer to York College. Without a York College evaluated transcript of previous course work students cannot be evaluated by a nursing program advisor.
3. Students must bring a copy of the RN license and current NYS registration to the Nursing Program Office (Science Building, Room 110).
4. Students must complete each pre-requisite course with a minimum of a C grade to be considered for admission. For students admitted to York College beginning fall 2013 Pathways General Education categories apply. Students admitted to York College prior to fall 2013 can opt to follow previous General Education or Pathways model. UNDECL-BA (Undeclared - Liberal Arts).
5. **When all pre-requisite courses have been completed the student is eligible to take:
Nursing 200*- CHALLENGE EXAM Professional Nursing Process 2 credits
Nursing 203 - Health Assessment and Wellness Promotion 4 credits**
6. An application for admission to the RN to BSN program is submitted during the Nursing 203 course. **Candidates will be ranked based on the Nursing 200 exam score and the Nursing 203 course grade.** Successful candidates will be notified by the Department of Nursing regarding their admission status in June. A mandatory orientation is held in July.

Please note the nursing programs are very competitive.

7. A total of 31 transfer Nursing credits are granted to all New York State licensed Registered Nurses enrolled in the Nursing Major.

Transfer Credits granted to all RNs

NURS 101	Nursing Process and Pharmacology	2
NURS 310	Nursing care of the Childbearing client/ family system	5
NURS 320	Deviation in Physiological Functioning I	7
NURS 340	Nursing care of Children	5
NURS 420	Deviation in Physiological Functioning II	7
NURS 430	Psychiatric/ Mental Health Nursing	5
Transfer Nursing Credits Subtotal		31

8. IMMIGRATION STATUS (Applies to all nursing students)

All CUNY nursing departments will require applicants for admission into the nursing clinical courses to provide documentation in one of the following categories:

1. U.S Citizenship
2. Permanent Residency
3. International student with F1 status
4. Granted Asylum, Refugee status, withholding of Removal, or Deferred Action Status by the U.S government

9. Notice to Students on Criminal Background Checks- Applies to all Nursing Students

Current laws generally permit a state licensing board or agency to deny a license to practice nursing if the applicant has been convicted of a felony or other specified crime. Like many state licensing boards, the Office of the Professions of the New York State Education Department requires that a criminal background check be conducted prior to granting a license to practice nursing. Questions should be directed to the NYS Office of Professions: at <http://www.op.nysed.gov>

The Department of Nursing at York College does not require a criminal background check, but the educational requirements include placement at one or more hospitals or other off-campus clinical training sites. These sites frequently require a student to undergo a criminal background check before the student can be placed for clinical learning experience. Based upon the results of a criminal background check, the site determines if a student's participation in its clinical training program would not be in the best interest of the site, and or the site may deny that student admission to the training program. Even if the student has already begun the placement when the results are received the site may elect to dismiss the student, regardless of the student's performance while in the training program.

Each clinical training site that requires a criminal background check sets its own standards and procedures, and you may be asked by the site to pay the cost of the background check. You may also have to complete more than one criminal background check during the course of the program at York College, depending on the number of sites you are placed and the requirements of each clinical site.

Please note that if a clinical training site determines that you may not take part in its training program based on the results of a criminal background check, you may be unable to complete your course requirements and continue in the desired nursing program. It is important for you to consider this before you enroll in the desired nursing program. York College has no obligation to refund your tuition or fees or to otherwise accommodate you in the event you are ineligible to complete your course requirements based on the results of a criminal background check, or if you are denied a license to practice nursing.

PLEASE NOTE: THE RN-BS DEGREE REQUIRES 120 CREDITS (60 OF WHICH MUST BE LIBERAL ARTS CREDITS)

Transfer course credits must have been earned at accredited institutions of higher learning. General education course credit may also be earned by satisfactory achievement on special examinations (i.e., Excelsior College, CLEP, and in-house examinations) subject to official evaluation of the York College Registrar's Office in consultation with the academic departments.

Candidates for admission to the Baccalaureate Nursing Program must meet all prerequisite criteria before acceptance into the Program.

Credit by validation examination may be earned through: Excelsior College and the College Level Examination Program (CLEP). Below is the list of courses you may challenge.

Excelsior Courses

Biology 336 Pathophysiology
Biology 234 Anatomy & Physiology I
Biology 235 Anatomy & Physiology II
Biology 265 Clinical Microbiology
Psychology 214 Developmental Psychology

CLEP Courses

Foreign Languages I & II
Sociology 101 Intro to Soc.
Psychology 101 Intro to Psych.

For additional information pertaining to these examinations contact:

Excelsior College (Regents College)
7 Columbia Circle
Albany, New York 11203
Telephone: (518) 464-8500

College Level Examination Program (CLEP)
P.O. Box 6600
Princeton, NJ 08541-6600
Telephone: (800) 257-9558

Please note: Students will be granted **waiver, not course credit** for courses challenged through CLEP. Course credit will be granted for challenge examinations taken through Excelsior College.

NURSING PROGRAM POLICIES

COMMUNICATION

All student- faculty communication should follow this format:

- Student first discusses issues and concerns with course lecturer and/or clinical instructor
- If additional information clarification is needed, the student will speak with the designated course coordinator
- If additional information clarification is needed course coordinator will speak with Undergraduate Program Director and/or Department Chairperson

CLINICAL COURSE REQUIREMENTS

Prior to every semester:

- **CPR certification:** Students in clinical courses are required to be certified in CPR (American Heart Association) (adult/child and AED) and provide documentation of this to the Nursing Office prior to registration.
- **Malpractice Insurance:** Students malpractice is currently covered by the City University of New York.
- **Health Clearance:** Each clinical course requires students to attend a clinical rotation in a hospital, nursing home or community setting. A part of the requirements for students to be allowed in these facilities is health clearance. Each student is required to complete an annual physical exam, *receive required vaccinations and/or titers*, complete a 10-panel drug test and have a current CPR card.

Collection of all student health record information will be handled by CastleBranch Compliance Tracking Solutions at a cost of \$89.98. This cost includes the management and tracking of your health records and the 10-panel drug test. *Drug testing is to be completed no sooner than 2 weeks before the first day of classes.* The link to the CastleBranch website where you can create an account for upload of all documents and drug test scheduling is <https://portal.castlebranch.com/UQ29dtim>. This is a mandatory requirement for every student entering the program.

- **COVID-19 Vaccine Update:** As of fall 2021 CUNY has been notified that some clinical and field placement sites are requiring students to provide documentation of COVID vaccination as part of the necessary clearance requirements. Students are strongly encouraged to consider COVID vaccination as it may potentially impact required program placements. If you need a COVID vaccine, please check <https://vaccinefinder.nyc.gov/> for available appointments in your area. If you encounter any difficulty obtaining a timely appointment, please contact a faculty member or your Department Chair for assistance. Faculty will explore all alternatives, as available, for those students who choose not to be vaccinated. If no suitable alternatives are available, this may result in a delay in progression in the program.
- The York College Medical- Physical and Nursing Student immunization forms must be completed by a physician (signed and stamped by the physician) and uploaded to the CastleBranch website. All health requirements **MUST be completed prior to the first**

week of classes by the due date before classes begin. If students do not have health clearance, they will not be able to attend clinical courses for that semester.

PLEASE NOTE: The Department of Nursing requires a specific detailed physical examination that exceeds the college requirements for physical examination and immunizations. These requirements comply with the New York State Department of Health and clinical site regulations, and must include immunization titers. Students must be free from addiction to drugs, alcohol or other behavior altering substances; able to stand, walk, bend, push, grasp and lift without restriction; and have normal sight, hearing and speech (with correction). Required forms are available:

<http://www.york.cuny.edu/student-development/health/forms>

TRACPRAC POLICY

PURPOSE

To create a valid and reliable process of evaluating student performance in the clinical area.

FREQUENCY OF EVALUATIONS

A TracPrac® electronic formative evaluation must be completed for each clinical day for each student.

TIMELINESS OF EVALUATIONS

Each formative evaluation should be completed within 24-hours of the clinical day, with few exceptions.

RESPONSIBILITIES OF THE CLINICAL EDUCATOR

- The clinical educator is responsible for obtaining training (online or in person) for the proper use of TracPrac. If additional one-on-one training is required, the clinical educator must notify the lead faculty or clinical coordinator to make arrangements.
- The clinical educator must complete his/her own evaluation of each student based on the performance. Educators may not record an evaluation for another clinical faculty.
- At the end of each rotation, the clinical educator must confirm that the student has received one evaluation for each day of clinical experience.

RESPONSIBILITIES OF THE STUDENT

- To acknowledge each clinical evaluation before the next clinical day. Students not acknowledging their evaluation before the next clinical/simulation day should be issued a "Needs Improvement/Progressing" grade for Professionalism.
- To notify the clinical educator or classroom educator if there is a concern about the accuracy of information within the electronic evaluation.
- To download and provide a copy of the clinical evaluation at the end of each semester.

RETENTION IN THE NURSING PROGRAM

- Earn a grade of “C” in all of the pre- or co-requisite courses.
- Earn a minimum of “C+” in all nursing program courses. Grades less than a C+ is considered failure.
- Students who earn less than a C+ (77) in two required nursing courses within the same term will be dismissed from the nursing program.
- Students who earns less than a C+ (77) in any two nursing courses while in the nursing program will be automatically dismissed from the program.
- Clinical and lab performance **is graded as pass/fail. Students must pass both clinical and theory components to pass the entire course.**
- **All students will be required to fulfill York’s Writing Intensive course requirements.**
- Students who are dismissed from any nursing program may be eligible to apply for another major in the college.
- Students have the right to appeal the dismissal decision.

ATTENDANCE

This Attendance Policy promotes professionalism, accountability, and excellence in patient care by ensuring nursing students attend all scheduled classes, clinical rotations, and other required educational activities. Consistent attendance is essential for the development of clinical skills, mastery of nursing knowledge, and the ability to work as part of a healthcare team. Absence from lecture, lab or clinical are **NOT** permitted and may result in failure of the course.

- **Clinical/Campus Labs:** Absence from clinical and campus labs are **NOT** permitted. Absence of clinical and lab will result in failure of the course. Students can submit a letter of appeal to the Nursing Appeals, Progression and Retention (APR) Committee and the student must submit proof of the event.
- **Lecture:** Absences are **NOT** permitted. In the event of an absence, it is the student's responsibility to obtain all content covered.
- Attendance will be taken at the beginning of each class period. The student will be marked absent if they are **NOT** present when the attendance is taken.
- All assignments are to be submitted on the due date.
- **All cell phones, pagers etc. must be turned off while in the classroom.** Participation in class discussion is essential to achieving the course outcomes. It is expected that each student will engage in critical reading, critical thinking and problem solving. **Students need to feel safe in the learning environment, therefore, recording of lectures is prohibited.**

LATENESS

Lateness to lecture, lab, and clinical is **NOT** tolerated at York College Department of Nursing.

- Students must be on time, this includes lectures, lab and clinical.
- The professor will not admit the student to lecture, lab or clinical if the student is late. This will result in an absence for the day.

- **Please do not schedule outside appointments during class, lab, or clinical hours.**
- If there is a medical emergency on the day of lecture, lab or clinical and this will cause lateness, a doctor's note is required for admittance.

Please understand that punctuality is an integral part of the nursing profession as nursing is a 24-hour care service. Tardiness will not be tolerated during academic formation or in the workforce. Attendance, punctuality, and professionalism are key elements in the role of a Registered Professional Nurse.

CLINICAL EXPECTATIONS for all clinical nursing courses

- Proof of current physical exam, up-to-date immunization titers and current American Heart Association CPR card must be submitted to the Nursing Program.
- Students are expected to arrive on time and be in the proper York College uniform.
- Students may be removed from the clinical area and/or the nursing program for demonstrating unsafe and /or irresponsible behavior. This includes, but is not limited to, administering medications without the clinical instructor present; failure to follow the instructions of the instructor or any situation where patient safety was compromised.

All nursing students perform their clinical work subject to the rules and regulations of the external health care agency and will be expected to comply with all requirements set forth by the agency, including their code of conduct. The agency holds the exclusive right, at their sole discretion, to prevent entry or request withdrawal from the clinical site for any student the agency believes constitutes a risk of harm to patients, visitors, or employees or who fails to follow the agency's policies and procedures. Students will be advised that misconduct resulting in removal from a clinical setting will result in further disciplinary action including dismissal from the program. Subject to appropriate procedural requirements pursuant to Department and College rules, and/or CUNY Bylaws.

The Department of Nursing adheres strictly to the American Nurses Association Standards and Scope of Practice.

Highlighted below is Standard 7. Ethics

The registered nurse practices ethically:

- Practices with compassion and respect for the inherent dignity, worth, and unique attributes of all people.
- Endorses the understanding that the primary commitment is to the healthcare consumer regardless of setting or situation.
- Maintains therapeutic relationships and professional boundaries.
- Safeguards the privacy and confidentiality of healthcare consumers, others, and their data and information within ethical, legal, and regulatory parameters.
- Advocates for the rights, health, and safety of the healthcare consumer and others.
- Demonstrates professional accountability and responsibility for nursing practice.
- Maintains competence through continued personal and professional development.
- Demonstrates commitment to self-reflection and self-care.
- Contributes to the establishment and maintenance of an ethical environment that is conducive to safe, quality health care.
- Advances the profession through scholarly inquiry, professional standards development, and the generation of policy.
- Collaborates with other health professionals and the public to protect human rights, promote health diplomacy, enhance cultural sensitivity and congruence, and reduce health disparities.
- Articulates nursing values to maintain personal integrity and the integrity of the profession.
- Integrates principles of social justice into nursing and policy.

UNIFORM POLICY

UNIFORMS ARE REQUIRED FOR ALL ON-CAMPUS LABS AND CLINICAL EXPERIENCES

Generic Nursing Program Uniform:

- The uniform style is specified by the department and must be purchased from Meridy's Uniforms online at www.meridys.com using the **Passcode York2002**. Each student will receive the York College Nursing student patch that is to be placed on the left upper sleeve. White hosiery or socks and clean white nursing shoes are to worn with the uniform. All garments worn under the uniform should be white. A plain (with no logos), long sleeved, white crew or turtleneck shirt may be worn underneath the uniform top.
- No lab coats or other garments are to be worn over the uniform except the white jewel neck warm-up jacket with embroidery purchased from Meridy's.

RN-BS Nursing Program Uniform:

- RN-BS students may wear York College white uniform top and black scrub pants with black shoes during Community Health clinical rotations and school sponsored clinical events. No lab coats or other garments are to be worn over the uniform except a white jewel neck warm-up jacket with embroidery purchased from Meridy's
- RN-BS students will wear a clean white lab coat during the NURS 203 on-campus labs.

ALL Nursing Programs:

- Grooming should reflect an understanding of professionalism, asepsis, and safety.
- In keeping with the various agency policies and maintaining student and patient safety:
 - Hair should be pulled back, away from the face and off the shoulders
 - Moustache or beards neatly trimmed
 - Make up should be minimal
 - No jewelry including rings (unless wedding band), necklaces, or bracelets
 - No hanging or dangling jewelry (small post earrings are permitted)
 - Nails should be trimmed with clear/ pale polish; **no nail enhancements/extensions**
 - Refrain from the use of perfume
 - No fake eyelashes
 - No heavy make-up
- No hats/ head coverings unless for religious purposes.
- Tattoos must be covered by clothing.
- No visible facial piercings; however, a waiver may be granted based on religious beliefs upon student request and documentation.
- York College photo identification badge **SHOULD BE VISIBLE AT ALL TIMES**

FAILURE TO COMPLY WITH THESE UNIFORM POLICIES WILL RESULT IN A
CLINICAL ABSENCE

ACADEMIC INTEGRITY

By enrolling in this course, students agree to act with honesty and integrity. Academic dishonesty includes, but is not limited to, cheating, plagiarism, collusion, sabotage, and falsification of records. It is prohibited in The City University of New York and is punishable by penalties, including failing grades, suspension, and expulsion. For definitions and an explanation of specific policies, see the College's Academic Integrity Policy on the York College Website: <https://www.york.cuny.edu/academics/academic-affairs/faculty-resources-1/academic-integrity/policy>. Should the instructor become aware of any suspicious dishonest activity, the instructor is required by College policy to submit a report of suspected academic dishonesty (cheating, plagiarism, damage to lab materials, etc.) to the Department Chair and the Dean of Students office. This report becomes part of your permanent file and may result in serious penalties.

If a student is found guilty of Academic dishonesty and receives a penalty, the grade affected by this penalty cannot be dropped.

POLICY ON ARTIFICIAL INTELLIGENCE (AI)

The increasing use and rapidly advancing pace of AI in academia have resulted in concerns surrounding legal and integrity issues. Therefore, the program has developed the following guidance. The use of any generative AI platform (including but not limited to ChatGPT) may not be used for any assignments or in any situation where the AI product (in part or whole) may be interpreted as being the student's work. Students may use generative AI platforms as explicitly permitted by the respective Nursing faculty member or preceptor. This policy will be reviewed continuously to align with York College and City University of New York's policies.

ON CAMPUS LABORATORY LEARNING EXPERIENCE

Generic nursing students are expected to participate in mandatory college laboratories on a weekly basis. Students must pass all skills performance tests, complete all required assignments (including pre-post simulation assignments), dressed in the York College nursing uniform including: York College ID, watch with second hand, and stethoscope to receive a passing grade in the course. Failure to demonstrate competency in selected skills, non-completion of assignments, and not adhering to the uniform policy will result in a failing grade for the course, even if the students has a passing grade in the didactic component of the course. Students might have weekly case study/ reflective question assignments that must be brought to the on-campus laboratory each week. On-campus lab practicums are rated as satisfactory (S) or unsatisfactory (U).

CLINICAL PERFORMANCE

Clinical learning experiences will include the provision of comprehensive nursing care to multi-cultural client systems in a variety of settings (Ambulatory care, acute in-patient and long-term care settings). Students will participate in weekly clinical experiences with an instructor in various settings, assigned by the nursing department. Students may be removed from the nursing program for demonstrating unsafe and/or unprofessional/irresponsible behavior. This includes,

but is not limited to, administering medications without a clinical instructor present; failure to follow the instructions of the instructor or any situation where patient safety was compromised or disruptive behavior on the clinical unit. Students are expected to successfully meet the objectives and requirements of both the theory, clinical, and laboratory components of the course in order to receive a satisfactory grade for the entire course. Clinical performance is graded as satisfactory (S) or unsatisfactory (U).

Maintaining health clearance each semester is mandatory. All documents, including the York College Medical-Physical and Nursing Student immunization forms must be completed by a physician (signed and stamped by the physician) annually and uploaded to the CastleBranch website. All health requirements **attendance** be completed before the start of the semester, or it will result in an unexcused absence. **No exceptions.** Not meeting deadlines for completion of all clinical requirements before the beginning of the semester may result in delayed progression or dismissal from the program.

Essential Competencies for Safe Clinical Practice

****Required for Applicants to the Nursing Program and Nursing Student Participation in the Clinical Setting.**

The practice of nursing requires performance of certain physical and mental competencies. All candidates for, as well as student in the nursing program, must be able to successfully demonstrated the ability to meet these essential competencies.

Essential Competencies for Safe Clinical Practice Table

Essential Competencies	Requirements	Examples/Outcomes
Communication Skills	Demonstrates the ability to use verbal and written English to communicate accurately and effectively with all individuals, sufficient to provide safe and effective patient care.	Serve as communication liaison between patients and other medical personnel. Clarify orders from health care providers, delegate tasks to support staff, and initiate interventions and health teaching. Clearly convey patient needs, nursing care and patient outcomes. Document in a manner that is coherent and legible.
Critical Thinking	Utilize appropriate judgment. Demonstrates ability to calculate measure and analyze. Incorporate previous knowledge from a wide range of subject areas into current practice.	Able to correlate theory to clinical practice. Able to prioritize. Identify cause and effect relationships in clinical settings.
Good Moral Character	• No felony or misdemeanor charges or convictions in any state or county. • No disciplinary actions against the candidate/student. • No substance abuse	Some clinical facilities require background checks and fingerprinting. Some clinical facilities require drug and alcohol screening. Students unable to successfully comply with these requirements may be unable to continue in the program.

Interpersonal Skills	Recognize and respect all people and their individual differences. Perform effectively under stress sufficient to maintain accountability and responsibility. Display flexibility and demonstrate compassion for all.	Establish professional rapport with all individuals and develop effective relationships. React professionally to emotional situations. Adjust positively to changing environments. Negotiate conflicts.
Mobility	Possess physical mobility necessary and sufficient to stand, walk, sit, bend, squat reach and lift in order to provide safe and effective care.	Able to move in and around patient care and treatment areas. Able to administer nursing care and perform emergency and non-emergency procedures. Able to lift, position and transfer patients.
Motor Skills	Possess gross and fine motor abilities sufficient to provide safe and effective patient care.	Can perform techniques essential for patient care, including but not limited to: insertion of tubes; preparation and administration of injections; operation, calibration and manipulation of equipment.
Sensory Skills	Possess auditory, visual and tactile abilities sufficient to assess and monitor health status, provide safe and effective patient care and ensure a safe environment.	Demonstrate capability for observation (seeing), palpitation (feeling), percussion (tapping), and auscultation (listening). Able to respond to alarms and signals. Can communicate effectively via voice or telephone.

Adapted from the Queensborough Community College Nursing Curriculum Committee Spring 2007

Weekly concept maps will be expected for each clinical client encounter. Concept maps will be graded satisfactory or unsatisfactory based on specific written guidelines. A minimum concept map average grade of “C+” is required for a satisfactory clinical grade.

PERFORMANCE REQUIREMENTS TO BE A CLINICAL NURSING STUDENT:

Mobility	Physical abilities sufficient to lift 30 pounds, move from room to room, maneuver in small spaces, and navigate stairwells
Motor Skills	Gross and fine motor abilities sufficient to provide safe and effective nursing care such as calibrating equipment; giving injections, etc.
Hearing	Auditory ability sufficient to monitor and assess health needs such as hear heart and lung sounds; respond to alarms, etc.
Visual	Visual ability sufficient for observation and assessment necessary in nursing care such as inspection of patients and equipment.
Interpersonal	Interpersonal abilities sufficient to interact with individuals, families and groups from a variety of social, emotional, cultural, religious and intellectual backgrounds.

INFECTION CONTROL/ STANDARD PRECAUTIONS

Standard Precautions are expected to be implemented by all students in the clinical setting.

- Exudative lesions, weeping dermatitis, or other possible communicable conditions should be brought to the attention of the clinical instructor prior to giving care.
- Appropriate barrier precautions should be implemented to prevent skin and mucous-membrane exposure when contact with blood or other body fluids is anticipated.
- Exposure to blood, body fluids, or needle sticks must be reported to the clinical instructor, in a timely manner.

CONFIDENTIALITY

Confidentiality of all information and records related to client care is a patient right in New York State and mandated by the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

Students who fail to maintain the patient’s right to confidentiality will receive a course grade of F and will not be permitted to return to clinical site.

No recorders, beepers or cellular phones are permitted in clinical agencies. **No discussion of patients on social media and no posting of any pictures.**

ACCIDENTS/ INJURY/ INCIDENTS DURING CLINICAL EXPERIENCES

If a student is injured during a clinical agency experience, they must be examined and treated in the emergency room and/or by their private physician. Health clearance must be obtained from the Office of Health Services before the student can return to the clinical agency.

Relevant incident reports for the agency and York College must be completed by the faculty and student. Students who have any change in their health status during the semester (due to injury, illness, pregnancy/ childbirth) are required to submit documentation to the Office of Health Services. Students must receive clearance from this Office prior to returning to clinical agency experience.

COURSE AUDITING

The nursing program does not permit auditing of nursing courses.

TEXTBOOKS

The York College Bookstore is now on line at <https://yorkcollege.textbookx.com/institutional/index.php> Visit the website for instructions of how to purchase books.

To help students save money in their textbook purchases, CUNY has created a web page and flyer called "How to Save Money on Textbooks." This resource provides links to websites that sell discounted new and used books, eBooks, open source materials, and rental options.

The web page can be found at: <https://www.cuny.edu/current-students/resources/textbook-savings/>. There are also links to this web page from the Blackboard log-in page and the portal home.

ADVISEMENT

Consultation with the Nursing faculty is a crucial step when planning one's academic program. Formal advisement is available during the period scheduled by the college. Please refer to the York College Academic Calendar. Appointments can be scheduled through the Department of Nursing secretary. At other times, individual conferences can be scheduled with the Nursing Program faculty. To ensure that your advisor has adequate time to answer your concerns, make an appointment. When you "drop in" for advice, remember that your advisor may have other responsibilities or tasks planned for that hour.

Placement in Clinical course sections vary each semester based on agency availability. **Students who are employed in a health care agency cannot be assigned to that agency for clinical classes.** Students who have special needs (i.e., work schedule) must submit a request for consideration in writing to the Director of Nursing Programs and/or Chairperson **no later than December 15 (for spring placement) and June 15 (for fall placement).** Every effort will be made to accommodate the request. However, there are limited clinical agency sites and days available; students may need to make other accommodations.

COLLEGE COSTS

A York College education is extremely affordable.

Undergraduate	Resident	Nonresident
Full time	\$3,465 per semester	\$620 per credit
Part time	\$305 per credit	\$600 per credit
Nondegree	\$445 per credit	\$915 per credit

See the Schedule of Classes for current fees and graduate tuition

We know that a college education costs more than just the tuition and fees. When we calculate your eligibility for financial aid we assign you a "Cost of Attendance Budget". This budget includes your tuition and fees along with allowances for the cost of books, supplies, transportation and miscellaneous personal expenses. There is a budget for students living with parents and a separate budget for those living away from parents see link <https://www.york.cuny.edu/financial-aid/college-costs>.

Financial Aid:

The College provides information about tuition and fees, financial aid, payment and refund policies in the College Bulletin: <http://www.york.cuny.edu/produce-and-print/contents/bulletin/financial-aid>; on site in the Financial Services Office (AC-1M08); on the website <http://www.york.cuny.edu/administrative/finaid>; and via phone (718 262 2230).

Federal assistance includes grants (ex. Pell, SEOG, ACG, SMART), work study, and Perkins Direct loans.

In order to continue to receive Title IV Federal Student Assistance, an undergraduate student must:

- Achieve at least the GPA required for probationary status at York and
- Accumulate credits equal to or greater than two-thirds the cumulative credits attempted, or accumulated credits equal to or greater than: ([75 percent of cumulative credits attempted]-18) and
- Attempt no more than 150% of the credits normally required for completion of the degree

Students are measured against the satisfactory academic progress standard at the end of the Spring term to determine eligibility for receipt of Title IV financial assistance for the upcoming academic year. Additional information can be found at: <https://www.cuny.edu/wp-content/uploads/sites/4/page-assets/financial-aid/Financial-Award-Program-GuideADA-2020-2021.pdf>; and: <http://www.york.cuny.edu/administrative/finaid>; and: <http://www.fafsa.ed.gov/index.htm>

The College provides information about tuition and fees, financial aid, payment and refund policies in the College Bulletin (<http://www.york.cuny.edu/produce-and-print/contents/bulletin/financial-aid>); on site in the Financial Services Office (AC-1M08); on the website (<http://www.york.cuny.edu/administrative/finaid>); and via phone (718 262 2230).

STUDENT RIGHTS AND RESPONSIBILITIES

Education is a cooperative effort between the expertise of the Faculty and willingness of the student to learn. The Nursing Faculty believes that you, the student have certain rights when you enroll in the Nursing Programs as well as responsibilities.

You have a right to:

- Accurate, organized, relevant, cohesive and quality nursing education and materials.
- Faculty who are knowledgeable, clinically experienced, up-to-date, and able to communicate information effectively.
- Quality classroom instruction that is punctual, clearly communicated, stimulating, and presented in a positive learning environment that is free of bias and/or hazards.
- Quality clinical instruction that is safe, provides a variety of experiences, and guides you toward effective nursing practice.
- Fair, impartial, and prompt evaluation of your performance, both theory and clinical.

- Support services to facilitate your participation in the learning process.
- Regular availability of your Faculty (scheduled as their office hours) for advice and assistance with academic or clinical matters.

You have a responsibility to:

- Be in charge of your own learning (which includes adherence to the York College attendance policies). Commit yourself to learning nursing theory and practice through whatever means necessary for you. Be aware of your strengths as a learner and learn to live with or overcome your weaknesses. Be an active participant in all learning experiences.
- Learn from the expertise and knowledge of the Faculty. Be prepared for all classes and clinical experiences, submit all assignments as scheduled.
- Attend class promptly and regularly. Be attentive to classroom activities, avoid talking out of turn, conversing with friends, or sleeping during a classroom presentation.
- Follow accepted standards of behavior for nurses as well as the York College codes and standards for behavior on and off the campus. Be prompt and reliable for all assignments and activities. Remember that you are a guest in the clinical agency and demonstrate appropriate social manners. Learn and abide by the agency's clinical policies and procedures. Remember that the primary responsibility of the staff nurses is patient care, not monitoring or instructing you.
- Allow sufficient time for the Faculty to grade assignments with fairness and thoughtfulness. Make appointments with Faculty to discuss grades, issues and concerns.

YORK COLLEGE GRADING SYSTEM

A+	4.00	97.0-100
A	4.00	93.0-96.9
A-	3.70	90.0 - 92.9
B+	3.30	87.0-89.9
B	3.00	83.0-86.9
B-	2.70	80.0 - 82.9
C+	2.30	77.0 - 79.9
C	2.00	73.0 - 76.9
C-	1.70	70.0 - 72.9
D+	1.30	67.0 - 69.9
D	1.00	60.0-66.9
F	0.00	00.0 - 59.9

The length of the semester is 15 weeks. One credit equals one semester hour. A minimum of 120 credits is required for a Baccalaureate Degree; 60 of these credits must be liberal arts credits.

POLICY ON INC GRADES

A student who, because of extenuating circumstances, is absent from the final examination and has completed the work for the course with a passing average may be assigned an INC grade. The student must contact the faculty member (in person, by phone or by e-mail) within 24 hours of the final exam to be considered for this option. If approved, the student will have up to three weeks in the subsequent semester within which to take the final and have the grade resolved. If not resolved, the INC grade will be changed to FIN by the Registrar's Office and be considered an F when computing the academic index.

A student who has taken the final examination, but because of extenuating circumstances, has not completed the work for the course, and has a passing average may, at the discretion of the Nursing Program Director and/or Chairperson, receive an INC grade. The student must receive permission for this option before the last day of class. If agreed upon, the student will have up to 10 weeks in the subsequent semester to complete the work and have the grade resolved. If not resolved in this time frame, the INC will be changed to FIN by the Registrar's Office and be considered an F when computing the academic index.

APPEALS POLICY

A student may appeal a grade, denial of admission to the nursing program, the right to repeat a pre-screening course, repeat a pre-requisite course, the right to repeat the pre-admission exam and dismissal from the nursing program. Students must submit the appeal in writing to the Department of Nursing Admission, Progression, and Retention Committee (APR), located in the Science Building room 110C. The appeal is logged and then forwarded to the Nursing Admission, Progression and Retention (APR) committee chair for recommendation and action. The committee recommendation is presented to the Department of Nursing faculty for a vote. Students will receive the decision in writing during the academic semester. Decisions by the department APR committee are based upon the following procedures:

PROCEDURES

Appeal of Prerequisite Course Grade

If a student wishes to appeal a grade that has been received, the student should initially consult the instructor. Should the student desire to pursue this matter further, the student may submit a written letter of appeal to the Department of Nursing's Nursing Admission, Progression, and Retention Committee (APR).

Denial of Admission into the Generic Nursing Program Students must:

- Obtain a score of at least 50th percentile on the National League of Nursing Preadmission Exam (NLN NEX)

- Earn a minimum of GPA of 3.00 in the following five prerequisite courses: Biology 234 – Anatomy and Physiology I, Biology 235 – Anatomy and Physiology II, Chemistry 106/107 – Essentials of College Chemistry, English 125 – Composition I: Introduction to College Writing, Psychology 102 – Introductory Psychology
- Completed all pre-screening/pre-requisite courses

Students may only repeat the NLN NEX exam **once**.

Students who have been denied admission into the Generic Nursing Program may make an appointment with the Chairperson of the Department of Nursing. Should the student desire to pursue this matter further, the student may submit a written letter of appeal to the Department of Nursing's Nursing Admission, Progression, and Retention Committee (APR).

Denial of Admission into the RN to BS Nursing Program

Students must:

- Have a current unencumbered New York State Registered Nurse License and Registration
- Successfully complete the NURS 200 Pharmacology Challenge Exam course with an 80% or better
- Complete NURS 203 with a minimum grade of a C+.
- Students who have been denied admission into the Nursing Program may make an appointment with the Chairperson of the Department of Nursing. Should the student desire to pursue this matter further, the student may submit a written letter of appeal to the Department of Nursing's Nursing Admission, Progression, and Retention Committee (APR).

PROGRESSION POLICY

Progression within the Generic and RN to BS Nursing Programs

Students must meet all admission criteria to progress to the nursing programs:

Generic nursing program candidates must complete all General Education or pathways and prerequisite courses, completion of all required lower division writing intensive courses, achieve a 3.0 GPA within the 5 key courses: a) BIO 234, b) BIO 235, c) CHEM 106/107, d) ENG 125 and e) PSY 102; and must achieve a minimum score at the 50th percentile on the NLN-PAX exam.

RN-BS nursing program candidates must complete all General Education or pathways and prerequisite courses, achieve a minimum grade of C+ in the NURS 203 Health Assessment course and score a minimum of 80% on the NURS 200 pharmacology challenge exam.

All students must complete each General Education or pathways and prerequisite courses course with a minimum grade of C. When a C grade is not achieved in any of the prerequisite courses, students may submit an appeal to request permission to have one opportunity to repeat that course, with the understanding that the new grade and the previous grade will be averaged together.

Students who earn less than a C+ (77) in two required nursing courses within the same term will be dismissed from the nursing program. In addition, any student who earn less than a C+ (77) in any two nursing courses while in the nursing program will be automatically dismissed from the program.

A student is allowed to withdraw from a nursing course while in the nursing program. However, a second withdrawal or failure to earn a minimum grade of C+ (77) in the repeated course will result in an automatic dismissal from the nursing program.

Students who have received notice of a grade below C+ (77) in a nursing course, must schedule an appointment to meet with the Chairperson of the Department of Nursing within 10 days, to discuss future progression within the nursing program and the possibility of registration for any non-clinical nursing course. Registration for any non-clinical nursing course is at the discretion of the Department of Nursing Chairperson.

Students must initially meet with the course instructor to request a grade change. A student may at any time thereafter submit a petition to have a grade change to the York College Committee on Academic Policy Standards.

Students who are denied progression to the next level of nursing courses may make an appointment with the Chairperson of the Department of Nursing. Should the student desire to pursue this matter further, the student may submit a written letter of appeal to the Department of Nursing's Nursing Admission, Progression, and Retention Committee (APR).

DISMISSAL POLICY

All Generic and RN to BS Students

Any student who has failed two required nursing courses with a grade below a C+ (77) will be dismissed from the nursing program.

Professional Misconduct

Any unprofessional or inappropriate behavior will be referred to the Undergraduate Program Director and may result in dismissal from the nursing program. Unprofessional or inappropriate behaviors, whether conducted on-campus, off-campus, or in an online format, include, but are not limited to:

- Dishonesty, plagiarism, cheating, false reporting, falsifying records, or failure to maintain patient confidentiality.
- Violating the drug and alcohol policies of York College.
- Abusive or threatening language, or profanity which could be interpreted as such.

- Placing patients or fellow students in danger (for example: not following universal precautions when handling contaminated devices).
- Engaging in activities that could be viewed as egregious.
- Exhibiting hostile, disrespectful, or uncooperative behavior towards faculty, staff, students, or patients.
- Conviction of a felony.
- Failure to adhere to the stated program or CUNY rules and regulations.

Should the student desire to pursue this matter further, the student may submit a written letter of appeal to the Department of Nursing's Nursing Admission, Progression, and Retention Committee (APR).

In the case of First Semester Generic Students

If a student fails only one nursing course in the first semester of the nursing program the student will be allowed to repeat that nursing course with the understanding that a second failure of any nursing course will result dismissal from the Generic Nursing.

If a student fails more than-one of the three nursing courses (NURS 204, NURS 210 or NURS 101) in their first semester the student will be automatically dismissed from the Generic Nursing Program.

Students who receive a notice of dismissal from the nursing program must schedule an appointment to meet with the Chairperson of the Department of Nursing within ten days. Students may then appeal to the Department of Nursing Admission, Progression and Retention Committee within 5 days of meeting with the Chairperson to appeal the Chairperson's final decision. The student may appeal the Department of Nursing Admission, Progression and Retention Committee's decision to the School of Health Sciences and Professional Programs within five business days of receiving a certified letter of dismissal decision from the Department of Nursing Admission, Progression and Retention Committee. The student will follow the guidelines for submission of an appeal on the School of Health Sciences and Professional Programs' website at <https://www.york.cuny.edu/academics/departments/health-and-behavioral-sciences>

***Adherence to the American Nurses Code of Ethics and to the York College Code of Conduct. Failure to meet any one of the criteria listed above may be grounds for probation or dismissal from the Nursing Program at CUNY York College.**

WITHDRAWING FROM COURSE(S)

A student can drop a course during the first THREE weeks of classes, and the course will not appear on your transcript. It must be done using Schedule Builder. A student can still withdraw between the 4th and 10th week of classes using Schedule Builder. At this point a "W" grade will appear on the transcript. After the 10th week of classes, a student must petition the Committee on Academic Policy and Standards, in room AC-4G04 to retroactively withdraw from a course(s). If not, it will result in your receiving a WU for the course(s), which has no negative impact on the

GPA but indicates an unofficial withdrawal. Withdrawing from a course(s) with a W or WU grade may affect FINANCIAL AID AWARD(S). Please contact and discuss this matter with a Financial Aid Advisor in Room 1M08 prior to withdrawing (at any time during the semester).

COMMITTEE ON ACADEMIC POLICY AND STANDARDS Room 4G04, 718-262-2770

The Committee on Academic Policy and Standards deals with the following petitions:

- **WITHDRAWAL**, dropping a course after the withdrawal deadline.
- **LEAVE OF ABSENCE**, dropping all your courses after withdrawal deadline.
- **EXT OF “INC”**, INC grade extension to complete course.
- **APPEAL OF DISMISSAL**, dismissed after being on probation. As soon as possible, appeal dismissal.
- **READMISSION**, returning to York after a semester or more out of the college and on probation.
- **GRADE CHANGE**, changing a grade with the Instructor’s Input.
- **GRADE APPEAL**, changing a grade without the Instructor’s Input.
- **APPEAL OF DENIAL**, as soon as possible, appealing your denial from the Committee.

(Students must provide written documentation stating the reason for the petition. The committee determines length of time for petition)

STUDENT TESTING POLICY

This testing policy is to be read and understood by all students prior to sitting to take an exam required for the York College Nursing Program. Please be advised that, pursuant to accreditation requirements, the nursing program requires the mandatory use of remote proctoring tools for exams for all students in all nursing courses, regardless of whether a course is given in person or remotely.

The Nursing Program adheres to the policy and procedures on academic integrity put forth by the City University of New York. For details, refer to the York College Nursing Program Student Handbook, the York College Handbook, and the CUNY website.

POLICY

Students are expected to report to the testing area to take all exams on the scheduled dates. It is the student’s responsibility to verify the time and location of an exam with the faculty member. Students who do not take an exam on the scheduled date are required to take a make-up. Students will be permitted to take one make-up exam per course at the discretion of the course faculty member. Faculty members reserve the right to create a make-up exam in any format deemed appropriate. Students who fail to take the scheduled make-up exam will receive a grade of zero for that exam. All make-up exams will be given at the end of the semester. **All make-up final exams will follow the college policy.**

Every student is responsible to arrive on time for an exam. If a student arrives late for an exam, they will forfeit the time missed. No extra time will be allowed for any student arriving late. If a student arrives more than 15 minutes late for an exam, they will not be allowed to enter the testing room.

All students must "log in" to the computer using their password 24 hours **prior to arriving to the testing location** to ensure they will be able to access the exam at the testing site.

TIME FRAMES FOR EXAMS

- 60 minutes for a 50-question exam
- 120 minutes for a 100-question exam

Please note: **Backtracking is not permitted once you have answered a question.**

TESTING AREA REGULATIONS DURING ALL EXAMS:

No electronic devices are allowed in the immediate testing area. All cell phones must be turned off completely (do not put them on vibrate) and stored in personal belongings at the front of the room. Do not wear smart watches on the day of the exam. Only calculators distributed by faculty may be used in the testing area.

Student seating for the exam will be randomly assigned at the discretion of the faculty.

All scratch paper distributed to students must be returned to the faculty member immediately at the finish of the exam.

Students should sit at computer terminals with computer shields before beginning the test. If a computer shield is not available at the terminal the student must inform the faculty member.

All personal belongings will be placed in front of the room. This includes but is not limited to:

- Bags, purses, wallets
- Books, study materials
- Cameras
- Coats, hats, scarves, gloves
- Food or drink
- Gum or candy
- Lip balm

Students may be asked to present a valid photo ID at the discretion of the faculty member.

RESTROOM:

- Use the restroom before beginning the exam.
- ***For 50 item unit exam students*** will not be permitted to leave the testing area to use the restroom.
- ***For the final exam***, students may use the restroom only if accompanied by a faculty or staff member.

UPON EXAM COMPLETION:

- Log off of the computer terminal immediately after you have completed testing.
- **All Nursing Students should be aware that any disclosure of examination items before, during or after the examination is a violation of the Academic Integrity Policy.**
- After the exam is reviewed in class, students who wish to review their exam must make a request with the faculty member no more than 2 weeks after completing the exam.
- Students **will not** be allowed to review the final exam until after grades and attendance have been posted. Instructors will hand score the final exam at the request of any student who fails the course.

I have read the above and agree to comply with the York College Department of Nursing Academic Integrity policy. I understand that I am not permitted to copy, discuss, or distribute information regarding any items on any exams.

GENERIC PROGRAM COURSES

NURS 101- Nursing Process and Pharmacology

2 Credits; 2 Hours WEB option

Course Description:

The Nursing Process will be utilized as the problem-solving approach in providing students with the fundamental concepts and skills needed for the safe and accurate administration of pharmacologic agents to client systems across the life process. Basic mathematical operations and measurements systems will be utilized for calculating drug dosages. Emphasis will be placed on safety measures and client education. Legal, moral and ethical responsibilities in professional nursing practice will be examined.

Learning experiences will be designed to assist the students in developing critical-thinking skills. The course has a weekly mandatory Seminar.

NURS 204- Health Assessment- Wellness Promotion (generic program)

4 Credits; 3 Hours Lecture; 3 Hours Lab

Course Description:

The nursing process and Intersystem framework will be utilized to assist the students in developing bio-psycho-socio-cultural physical assessment skills as the basis for diagnosing and treating responses to actual or potential health problems. Teaching/learning principles will be used in assisting client system with greater potential to maintain high-level wellness. College laboratory experiences will be provided to assist the students in developing health assessment and teaching/learning skills.

NURS 210- Fundamentals of Nursing Practice

6 Credits; 3 Hours Lecture; 3 Hours lab; 6 Hours Clinical

Course Description:

The course integrates principles presented in the natural, behavioral sciences and humanities, to introduce the student to professional nursing practice. The Nursing Process and General Systems Theory are utilized to assist the student in developing basic nursing skills and therapeutic communication techniques to promote and maintain high-level wellness in multicultural individual client system in a variety of settings. Ethical, moral and legal aspects related to client-nurse relationships are addressed. Principle of nursing research and evidence-based practice are highlighted as the student acquires selected nursing skills.

NURS 301 WI- Values in Transition: Perspectives of Professional Nursing

3 Credits; 3 Hours WEB option

Course Description:

This course introduces students to the structure of the discipline of nursing, selected theoretical and conceptual models and their application to nursing practice, research, and education as a foundation for socializing/re-socialization into the professional nursing practice.

NURS 302- Pharmacology for Nurses

3 Credits; 3 Hours

Course Description:

The course utilizes a systems approach and draws on information from multiple disciplines to build on fundamental knowledge of pharmacology. Students are provided with an in-depth examination of the complex interrelationships between pharmacotherapeutics, pharmacokinetics, pharmacodynamics and pathophysiologic processes. Emphasis is placed on pharmacotherapeutics, as it relates to critical thinking, client education, life-span issues, cultural considerations and evidence-based clinical guidelines in nursing practice.

NURS 310- Nursing Process: Nursing care of the Child-bearing Client/Family System

1/2 semester

5 Credits; 6 Hours Lecture; 3 Hours lab, 8 Hours. Clinical

Course Description:

The Nursing process and General Systems Theory are utilized in providing students with the theoretical basis and clinical skills needed to provide culturally sensitive care to client systems during the child bearing/ child-rearing stages of the life process. Students relate research findings to provide evidence-based nursing interventions with focus on client education. Legal, moral and ethical considerations are explored. Primary, secondary and tertiary levels of prevention are examined with emphasis on the primary level.

Clinical laboratory learning experiences are designed to provide opportunities for the student to function in variety of settings including in-patient, ambulatory and community health care settings.

NURS 314- Management and Leadership in Professional Nursing/Client Intersystem

3 Credits; 3 Hours

Course Description:

This course introduces the process of decision-making, leadership, management, change, collaboration and advocacy as a basis for planning strategies which facilitate the professional nurse individual/family/group inter-systems in the promotion and maintenance of health. Topics such as performance improvement and peer review will be analyzed.

NURS 320- Deviations in Physiological Functioning I: Nursing Interventions for the Adult/Family client systems

7 Credits; 5 Hours. Lecture; 3 Hours lab; 7 Hours Clinical

Course Description:

This course utilizes the Nursing Process and General System Theory to focus on caring for the multicultural individual/family client system who is experiencing deviations from wellness. Principles presented in the natural and behavioral sciences, humanities and nursing theory are integrated to assist the students in synthesizing knowledge that requires interventions to restore the client to his/her optional level of wellness or to a peaceful death. Levels of prevention are examined with emphasis on the secondary level. Ethical, moral and legal issues in nursing practice are addressed. Nursing research and evidence-based practice are incorporated into the care of individual/family system.

NURS 340- Nursing care of Children: Infancy to Adolescence

1/2 semester

5 Credits; 6 Hours lecture; 3 Hours Lab; 8 Hours. Clinical

Course Description:

The Nursing Process and General Systems theory are utilized in providing students the theoretical basis and clinical skills needed to provide culturally sensitive care to children & their families from infancy through late adolescence. The course facilitates integration of the concepts of communication and growth and development to provide primary, secondary and tertiary levels of intervention to children and their families who are experiencing disruption in their biopsychosocial integrity.

NURS 406- Professional Nurse-Societal and Community Client Intersystem Emergent Evolution
3 Credits; 3 Hours

Course Description:

Integrative knowledge of the liberal arts, nursing theory and general systems theory are utilized to analyze the inter-relatedness of selected societal and community systems and the health of human systems. The concepts of power, politics, policy and change are employed to explore the emerging and evolving roles of the professional nurse as a catalyst for planned change to improve health/nursing care delivery and the health of human systems. Selected field trips (i.e., health care facility, educational institutions, Supreme Court, Professional Nursing Association etc.) are included.

NURS 407 WI- Research in Professional Nursing Practice

3 Hours; 3 Credits WEB option

Course Description:

This course provides students the opportunity to synthesize knowledge and skills from the natural and behavioral sciences, humanities, and nursing theory in order to understand the research process and its importance in guiding nursing practice and improve the care of nurse-client intersystems. The student will identify a researchable problem and utilize the research process to develop a proposal. Emphasis will be placed on identifying the best available research evidence and integrating it with clinical nursing decision-making. This course is available online.

NURS 415- Professional Nurse-Family, Group and Community Intersystems- Generic

1/2 semester

4.5 Credits; 6 Hours. Lecture; 3 Hours Lab 6 Hours Clinical

Course Description:

The nursing and epidemiological processes are utilized to initiate change in professional nurse interactions with the multicultural family/group/community- environment inter-systems throughout the life process, to facilitate health maintenance and promotion. Theories related to group dynamics are explored to reinforce leadership/management, teaching/learning and decision-making skills.

NURS 420- Deviations in Physiological Functioning II: Nursing Interventions for Adult/Family client systems

7 Credits; 5 Hours. Lecture; 3 Hours lab; 7 Hours clinical

Course Description:

This course utilizes the Nursing Process and General System Theory as well as Group and Crisis theory to focus on caring for the multicultural individual/family/group client systems experiencing biophysiological instability that requires emergent or urgent nursing interventions. The course builds on principles presented in NURS 320 and requires more complex nursing interventions to address deviations and complications in order to restore the client to an optimal level of wellness or to a peaceful death. Ethical, moral and legal issues in nursing practice are addressed. Research is applied to practice through the use of the best evidence currently available for clinical decision making.

NURS 430- Nurse- Client Intersystem: Psychiatric/ Mental Health Nursing

1/2 semester

4.5 Credits; 5 Hours. Lecture; 9 Hours. Lab/ clinical

Course Description:

This course utilizes the Nursing Process and General Systems Theory in providing students with the theoretical knowledge and skills to promote the mental health of multicultural client systems throughout the life process. Commonly occurring and complex mental disorders affecting individual, family and group client systems are examined. Primary, secondary and tertiary levels of prevention are addressed. Students will use therapeutic communication techniques as they interact with client systems with mental disorders. Clinical learning experiences are provided in a variety of mental health settings.

RN TO BS PROGRAM COURSES

NURS 200- Challenge Exam Professional Nursing Process

2 Credits

Course Description:

This is a challenge examination available to registered nurses who plan to enter the York College RN to BS program. The exam includes dosage calculations and pharmacology test items framed in the nursing process. Students contact the Nursing Program Office to register for this exam.

NURS 203- Health Assessment- Wellness Promotion

4 Credits; 3 Hours. Lecture; 2 Hours. Lab. Hybrid option

Course Description:

The nursing process and Intersystem framework will be utilized to assist the students in developing bio-psycho-socio-cultural physical assessment skills as the basis for diagnosing and treating responses to actual or potential health problems. Teaching/learning principles will be used in assisting client system with greater potential to maintain high-level wellness. College laboratory experiences will be provided to assist the students in developing health assessment and teaching/learning skills.

NURS 301 WI- Values in Transition: Perspectives of Professional Nursing

3 Credits; 3 Hours WEB option

Course Description:

This course introduces students to the structure of the discipline of nursing, selected theoretical and conceptual models and their application to nursing practice, research, and education as a foundation for socializing/re-socialization into the professional nursing practice. This course is available online.

NURS 314 - Management and Leadership in Professional Nursing/Client Intersystem

3 Credits; 3 Hours WEB option

Course Description:

This course introduces the process of decision-making, leadership, management, change, collaboration and advocacy as a basis for planning strategies which facilitate the professional nurse individual/family/group inter-systems in the promotion and maintenance of health. Topics such as performance improvement and peer review will be analyzed.

NURS 315- Professional Nurse-Family, Group and Community Intersystem I

5 credits; 3 Hours lecture; 6 Hours clinical

Course Description:

The nursing and epidemiological processes are utilized to initiate change in professional nurse interactions with multicultural family/group/community - environment inter-systems throughout the life process for health maintenance and promotions. Theories related to group dynamics are explored to reinforce leadership/management, teaching/learning and decision-making skills.

NURS 405- Professional Nurse-Family and Community Intersystem II: Disruption in Health Patterns

3 Credits; 3 Hours Lecture

The Nursing Process and Intersystem framework will be utilized in complex professional nurse/client environment interactions with populations who are experiencing actual or potential decreasing levels of biopsychosocial-cultural wellness. Contemporary concepts of community mental health nursing, crisis theory, developmental theory and nursing theory are integrated to facilitate a higher level of stage of growth (the dying process) are incorporated.

NURS 406- Professional Nurse-Societal and Community Client Inter-System Emergent Evolution

3 Credits; 3 Hours

Course Description:

Integrative knowledge of the liberal arts, nursing theory and general systems theory are utilized to analyze the inter-relatedness of selected societal and community systems and the health of human systems. The concepts of power, politics, policy, and change are employed to explore the emerging and evolving roles of the professional nurse as a catalyst for planned change to improve health/nursing care delivery and the health of human systems. Selected field trips (i.e., health care facility, educational institutions, Supreme Court, Professional Nursing Association etc.) are included.

NURS 407 WI- Research in Professional Nursing Practice

3 Hours; 3 Credits WEB option

Course Description:

This course provides students the opportunity to synthesize knowledge and skills from the natural and behavioral sciences, humanities, and nursing theory in order to understand the research process and its importance in guiding nursing practice and improve the care of nurse-client intersystems. The student will identify a researchable problem and utilize the research process to develop a proposal. Emphasis will be placed on identifying the best available research evidence and integrating it with clinical nursing decision-making. This course is available online.

ELECTIVE COURSE

NURS 450 Assessment of Health Needs in a Global, Underserved Community

3 Hours; 3 Credits

Course Description

This elective, independent study course provides with a service-learning experience as well as an opportunity to assess the health needs of a global health community. One of the YC nursing program outcomes focuses on advocating for health policies that address local and global health issues. This elective course will offer a unique experience for students to interact with community members and identify their unique health needs. The course is three credits (lecture and clinical).

STUDENT ATTESTATION

I, _____ attest that I have received, read, and fully understand the **York College Department of Nursing 2025-2026 Nursing Student Handbook; and** agree to comply with the policies and provisions listed in it including the requirements for health clearance, CPR and malpractice insurance and the testing policy.
